FIRE BRINGS TRAGIC DEATH—Volunteer firemen from Mishicot, Tisch Mills, Rockwood and the Town of Two Rivers Fire Departments continued to pour water on the burning home of George Schmidt of Mishicot but the real tragedy had already struck. Mr. Schmidt was burned to death in the blaze which is believed to have been caused by an explosion due to a short circuit in the electrical system or a malfunctioning sump pump. He had been in the basement checking the pump when the tragedy happened. The explosion set off a fire which quickly spread to the oil furnace and then throughout the entire home. His body was removed from the basement by County Traffic Officer Tony Kubis and two unidentified volunteer firemen who had to probe for it in knee deep water. Nothing was salvaged from the 2½-story home. Mrs. Schmidt who was on the first floor at the time of the accident escaped without serious injury.
